# The Visualisation Recipe

1. Identify Data Object and Data Attributes to visualise.

Object: the invariant thing this visual is about….

Attr I	Attr II	Attr III	Attr IV

2. Identify the data types of your attributes.

Categorical   Quantitative

Attr I	Attr II

3. Rank attributes by importance. 2-3 are great, careful with more.

| Attr II | **Rank #1** |
| Attr I | **Rank #2** |

4. Map the attributes to channels according to their importance.

| Attr II | **Rank #1** | ⟶ | **Position Y** |
| Attr I | **Rank #2** | ⟶ | **Position X** |

5. Get data into the right shape.

Attr II

	Value
Cat 1	
Cat 2	
Cat 3	

Attr I

6. Visualise.
